

ARPIT DWIVEDI

iOS Developer – Swift, SwiftUI, Reactive Architecture

(+91) 7379664324 | arpitdwivedi2611@gmail.com | [LinkedIn](#) | [GitHub](#) | New Delhi, India

SUMMARY

iOS Developer with 4+ years building production fintech and consumer apps in Swift, SwiftUI, and UIKit. Currently at Ajaib, Indonesia's leading investment platform, working on trading, portfolio, and search features using MVVM+TCA, RxSwift, and Texture (ASDisplayKit). Previously scaled Bobble AI's flagship app from 68% to 93% crash-free users while driving 100% DAU growth, and shipped on-device ML (TensorFlow Lite to Core ML) and an in-app LLM chatbot. Strong in reactive programming, modular architecture, and cross-team SDK development.

EXPERIENCE

Ajaib (PT Ajaib Sekuritas Asia)

Oct 2025 – Present

iOS Software Developer

Remote, Indonesia

- **Global Navigation Bar:** Replaced 5+ legacy per-screen nav implementations (Stocks, MF, US Stocks, Portfolio) with a single config-driven `GlobalNavigationBar` component, lifting conversion to 83.90% against an 81.30% target (103% of goal)
- **Portfolio Buy Drawer:** Built a unified multi-asset buy drawer (stocks, MF, US stocks, bonds, crypto) on RxTCA, shared across AjaibStock and AjaibCoin – lifting trading retention (MTU/MAU) to 41.0% against a 28.20% target (145% of goal)
- **SwiftUI + TCA Migration:** Migrated the Kamus (financial glossary) feature and the entire Portfolio tab from UIKit to SwiftUI/TCA, establishing and scaling the team's UIKit-to-SwiftUI migration pattern
- **Real-Time Infra:** Replaced the legacy WebSocket flow with a Centrifugo-based real-time client layer, improving live data performance across trading and portfolio screens
- **Search & Config-Driven UI:** Implemented fuzzy search with real-time suggestions and entry-point analytics; built a Firebase Remote Config-driven floating tab bar and invest sub-menu for feature toggles without app releases

Bobble AI

Mar 2022 – Sep 2025

iOS Software Developer

Gurugram, India

- **SwiftUI App Revamp:** Rebuilt the company's flagship iOS app in SwiftUI (LazyVGrid, GeometryReader, ScrollPreferences) and migrated state management to Combine, significantly reducing UI-state-related bugs
- **On-Device ML:** Integrated a word-prediction model into the keyboard SDK by converting a TensorFlow Lite model to Core ML (`.mlmodel`) via `coremltools`, enabling on-device inference with no server round-trip
- **In-App AI Chatbot:** Built an LLM-powered chatbot (REST API integration) that answers both product questions – explaining Bobble's features – and general user queries
- **Performance & Growth:** Improved crash-free users from 68% to 93% and crash-free sessions from 92% to 99.5% through targeted concurrency (GCD, OperationQueue, async/await); shipped features driving 100% DAU growth and 20% higher retention
- **Enterprise SDK:** Built a custom iOS keyboard SDK via Swift Package Manager, adopted by 5+ enterprise clients and distributed across 5+ apps with 4.8+ App Store ratings

TECHNICAL SKILLS

Languages & UI: Swift 5.9, SwiftUI, UIKit, Objective-C, Xcode

Architecture: MVVM, TCA / RxTCA, VIPER, Coordinator Pattern, Clean Architecture

Reactive & Concurrency: RxSwift, Combine, async/await, GCD, OperationQueue

Frameworks: Texture (ASDisplayKit), ARKit, Core ML, TensorFlow Lite (`coremltools`), Core Data, In-App Purchases, Push Notifications, Keychain

Networking & Infra: Alamofire, URLSession, REST, WebSocket, Firebase Remote Config, SSL Pinning

Tools & Quality: Git, Fastlane, Jenkins, XcodeGen, CocoaPods/SPM, SwiftLint, XCTest, Firebase Crashlytics, CleverTap, Sentry, Instruments

EDUCATION & CERTIFICATIONS

Lovely Professional University

2019 – 2023

B.Tech, Computer Science Engineering

Punjab, India

- Student Head Coordinator, Grip Club; Technical Lead, Triple T Club

Certifications

2021 – 2024

iOS Development & Technical Excellence
